

Tuesday 2nd February Science Task

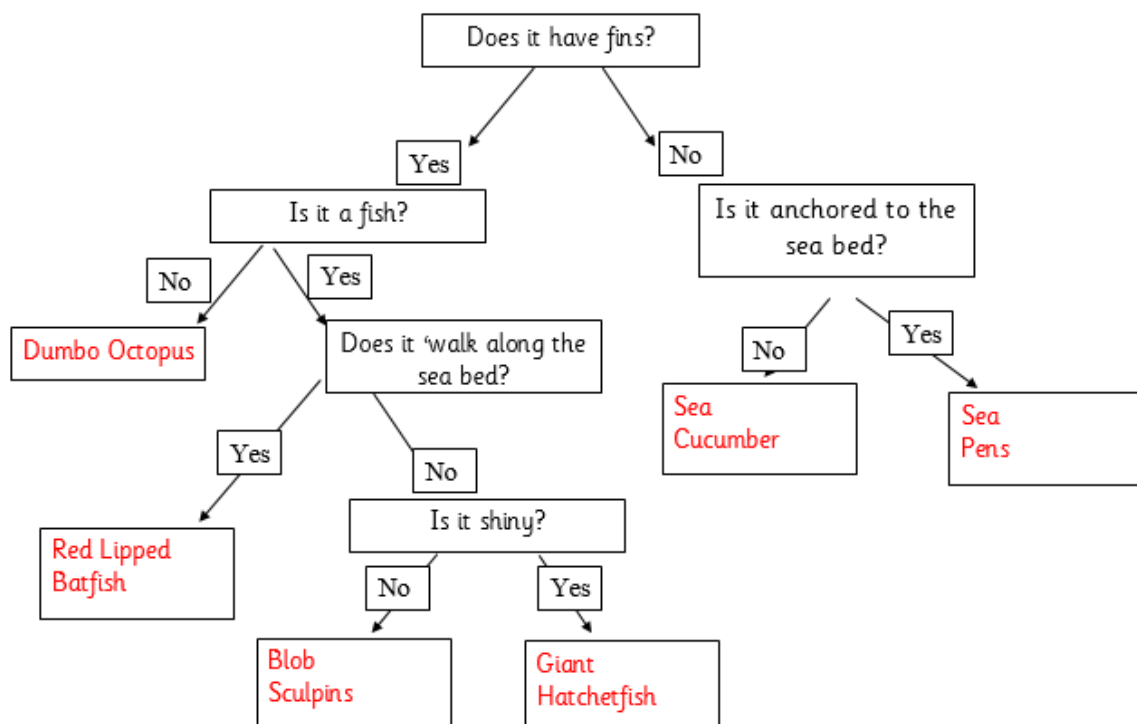

Classification Keys

Today we are going to carry on with classification keys. You could look through the PDF from last week, or watch the video on BBC Bitesize to refresh your memories.

<https://www.bbc.co.uk/bitesize/topics/zxjj6sg/articles/z9cbcwx>

Classification keys are a set of questions about the characteristics of living things. You can use a key to identify a living thing or decide which group it belongs to by answering the questions.

Task 1: Look at the pictures below. Use the classification key to find out the names of these unusual sea creatures.

crab

dolphin

whale

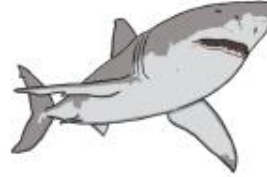

octopus

sea turtle

clownfish

shark

seahorse

them? Can you discuss with a grown up how to sort them into groups, then create a classification key.
